xeo®

## The Power of One

We recognize that selecting an all-in-one aesthetic platform is more than just a purchase—it's a long-term investment. That's why we made xeo® the most robust, tunable aesthetic workstation in its class. Select from multiple energy-based technologies to customize your options based on your current needs today, and enjoy the flexibility to diversify your procedure portfolio for the future.

### Nd:YAG Laser (1064 nm)

Treat a broad range of conditions with the wavelength that CUTERA knows better than anyone. The original Nd:YAG optimized for hair removal, vascular lesions and CUTERA's signature Laser Genesis™ procedure.

### Intense Pulsed Light (500~1800 nm) Limelight® | Prowave LX™ | Acutip™ | Titan®

xeo's comprehensive menu of intense pulsed light options provides a complete range of treatments associated with signs of photoaging, such as fine lines and wrinkles, dyschromias and other skin imperfections.

### Er:YSGG Laser (2790 nm) Pearl® | Pearl® Fractional

xeo's resurfacing options are the perfect combination of coagulation + ablation for full-face resurfacing, and with a unique laser wavelength perfectly optimized for both.

# The Value of One

Customizing your xeo doesn't just mean adding new options. While each handpiece option provides effective stand-alone results, combination treatments cater to patients with a broad range of aesthetic concerns.

## xeo 2D

### Limelight® + Laser Genesis™

Diminish brown spots, redness, scars and other forms of skin imperfections with xeo 2D—a non-invasive, no downtime combination procedure combining xeo's Limelight and Laser Genesis.

## xeo 3D

### Titan® + Limelight® + Laser Genesis™

Efficiently remove the most common signs of aging, such as facial redness, benign pigmented lesions and wrinkles, with xeo 3D—a triple-strength procedure using xeo's Titan, Limelight and Laser Genesis.

## xeo Pearl FUSION

### Pearl® + Pearl® Fractional

Quickly eliminate deep-set wrinkles and global epidermal photodamage with Pearl and Pearl Fractional procedures for superior results in just a single treatment.
